

ALVIN GEORGE AMBATTU

Jalisco, Mexico | alvingeorge30@gmail.com | +52 (33) 3032-7340 | [linkedin](#) | [Credly](#)

Dynamic and results-driven **Frontend Tech Lead with over 5 years of professional experience** in MERN stack development, specializing in **React.js and Google Cloud Platform (GCP)**. Proven expertise in leading cross-functional teams, modernizing enterprise applications, and delivering scalable, high-performance frontend solutions. Adept at managing client relationships, driving innovation, and ensuring timely project delivery in fast-paced environments.

SKILLS

Professional Certification	5x GitHub Certified, 2x Google Cloud Certified
Programming Languages	JavaScript(ES6+), Python, C/C++, Core Java, COBOL
Front-End Development	React.js, Context API, Redux, React Query / TanStack Query, TypeScript, HTML5 & CSS3, Next.js, Responsive Design, Micro Frontends, Module Federation, Ant Design, Ant Visualization, AG Grid, Bootstrap,Fuse.js, Google Map React, Storybook, Cypress, Jest, React Testing, Zustand, WebSockets
Back-End Development	Express.js, Node.js, RESTful APIs Spring, Spring Boot, Microservices
Databases	SQL, Google BigQuery, MongoDB, IBM DB2, Oracle DB, Firebase
Cloud Platforms	Google Cloud (GCP), BQ, GKE, Cloud Run, Cloud Functions Pivotal Cloud (PCF)
AI Tools	Gen AI (Apps and Agents), Vertex AI, GitHub Copilot
VCS	Git, GitHub Actions, GitHub Admin, GitHub Advance Security
Build & DevOps Tools	Vite or Webpack Spinnaker,Docker
Project Management	Project Leadership, Client Delivery, Delivery Operations, Knowledge Sharing
Domain	E-Commerce, Retail, Pricing Management, Supply Chain

EDUCATION

Bachelor of Computer Science | APJ Abdul Kalam Technological University, India

Degree obtained in July 2021

- Distinguished student at IHRD College of Engineering | GPA: 7.9
- Activities and societies: Placement Team Lead, Sports Secretary, Senate Member
- Relevant Projects: Health Portal (State Level Hackathon), Semester Enrollment Portal (IHRD)

EXPERIENCE

Frontend React Tech Lead | IT Analyst | Delivery Manager, TCS - Mexico

The Home Depot (via [Tata Consultancy Services Limited](#)), July 2021 – Present

Management Excellence (Active, 10%)

- Led a 12-member nearshore team in Mexico, ensuring strong client relationships and on-time delivery.
- Achieved 10% business growth YoY through strategic engagement and financial planning.
- Drove cross/upskilling initiatives, achieving 100% AI certification within the portfolio and 80% compliance across the THD nearshore account.
- Spearheading Google Gen AI-based transformation initiatives across the account.
- Fostered a proactive, business-aligned engineering culture.
- Recognized with “Star of the Quarter” award across the entire retail account in Q1 FY25–26.

Technical Excellence (Active, 90%)

- Managed 4+ teams across the SKU price change lifecycle, supporting 20+ applications in the internal pricing portfolio.
- Supported over 20+ application and built over 5+ UI apps from scratch for use cases like Liquidation, Clearance, Disaster Management, and EOQ Dashboards.
- Extensive experience in Retail domain specializing in Price and cost Management System.
- Modernized legacy apps by migrating from PCF to GCP, React.js v14 to v17, implementing micro frontend architecture.
- Led performance-focused POCs and created a unified portal for pricing tools, reducing merchant planner friction and improving operational efficiency.
- Enhanced resiliency by e2e testing by Cypress.
- Supported deployments across PCF, App Engine, Kubernetes, and Cloud Functions.
- Performed SRE activity to be security complaint for GCP deployed application to implement Workload identity.
- Integrated Ant Design and AG Grid and used Vite and Rollup for bundling an enhanced application.
- Currently part of development of an AI-driven SKU price impact prediction dashboard using AG Grid and Vertex AI.
- Recognized for deep expertise in UI development, DevOps, and GCP-based application support.

Projects

The Home Depot (via [Tata Consultancy Services Limited](#)), July 2021 – Present

Pricing Projects (Java, Spring boot, Google Cloud, JavaScript, ReactJS, TypeScript, NodeJS, GKE)

- Developed and maintained 20+ UI applications, integrated with backend services built in Spring Boot 3.
- Backend servers connected to Big Query, DB2, and PostgreSQL, enabling seamless data loading into UI.
- Focused on frontend performance optimization while ensuring smooth API integration.

What If (Prediction UI App Google Cloud, JavaScript, ReactJS, TypeScript, NodeJS, GKE, Python)

- Contributed to a prediction application with orchestration logic in Python and metrics APIs in Java.
- Enhanced React UI by modifying API response objects and occasionally writing new APIs from scratch.
- Gained hands-on exposure to Python orchestration and Java metrics services while keeping frontend as the primary focus.

POC: Agentic AI with MCP Protocol (Google Agentic AI, ADK)

- Built a proof-of-concept where users interact with the app using natural language.
 - Integrated agentic AI models with MCP protocol to synchronize tools and dynamically adjust pricing. Explored cutting-edge AI integration with frontend applications, expanding technical exposure beyond traditional React workflows.
-
